ABOUT LONEROCK

**LONEROCK CONSTRUCTION EMPLOYS MORE THAN 1,000 PEOPLE
AND HAS A FLEET OF OVER 190 UNITS OF PLANT.**

Since opening its doors in 1980, Lonerock Construction has grown into a construction company with an annual turnover exceeding R500 million, and a 9CE, 8SB CIDB grading, with between 8 and 12 projects running at any given time.

We focus on medium to large-scale civil engineering contracts. Our services include bulk earthworks, roads, township services, industrial developments, shopping centres, pipelines, culverts, and small-, medium-, and large-sized concrete works, as well as runway construction.

Lonerock Construction currently operates in South Africa and Zambia. Our vision is to grow and empower our people to become a century-old construction company.

OUR SERVICES

PROJECT STRATEGY

Efficient construction starts with good planning. We provide strategic advice to make sure our clients' goals are met, efficiently and cost-effectively.

CLIENT REPRESENTATION

We are involved in many of our projects from the early design stage. This helps us steer the design in a direction that will ensure design quality, value for money, efficiency and ultimate effectiveness.

PROJECT-BRIEF MANAGEMENT

It is important that our clients get exactly what they want. That's why we rigorously manage each brief to ensure our clients' requirements are clearly communicated to the project team, ensuring that there is no difference between client expectations, and ultimately, project delivery.

BUDGET MANAGEMENT

During larger projects, we work closely with our clients' quantity surveyors and planners. This results in budgets being effectively controlled and monitored throughout the project and ensuring that the client is kept fully in the picture and made aware of any potential risks.

ZAMBIA INTO AFRICA

Urban Roads Upgrade, Lot 9, Matero. Layerworks, Ancillary Works and Surfacing of Urban Roads in Matero Township, Lusaka

Lonerock is the co-founder of Lonerock Construction Zambia, a Level 1 NCC-registered construction company based in Lusaka. Lonerock Zambia is led by CEO Doreen Mwamba, a Zambian entrepreneur and the majority shareholder. The remaining shares are held by Lonerock South Africa.

Lonerock Zambia focuses on providing service excellence to private clients, primarily located in the Copperbelt, as well as to government departments, with road construction being the primary focus.

Recently completed projects include the upgrading of urban roads in Matero Township, Lusaka, and the execution of emergency repairs to rural roads in the Eastern Province.

SKILLS DEVELOPMENT

DEVELOPING OUR PEOPLE

Lonerock Construction aims to be the employer of choice for people in the construction sector. That is why we take skills development seriously.

All of our companies—Lonerock Construction, Lonerock Plant, and Lonerock Zambia—are committed to optimising our employees' performance. Through education, training, and development, we strive to ensure that everyone who works for us reaches their full potential.

Both of our South African companies are registered with the Construction Sector Education and Training Authority (CETA).

Our implemented Skills Development Programmes benefit local communities as well as society at large, with several learnership opportunities specifically aimed at unemployed graduates.

EMPOWERMENT

EMPOWERING PEOPLE TO DRIVE PRODUCTIVITY

Lonerock Construction has attained Level 1 BBBEE Contributor status, with a 9CE, 8SB CIDB grading. We comply with over 75% of the requirements in South Africa's Construction Charter.

We have exceeded our target of 35% black ownership; currently, black ownership at Lonerock stands at 39%, with 14% held by our workers' trust and 25% in individually owned shares. We also have 25% black female representation on the company's board and in executive management.

Additionally, we have set targets for 68% black representation in junior management, 45% in middle management, and 35% in senior management. All of these targets have been exceeded, with black employees now making up over 80% of junior management.

More than 75% of our procurement spend is with BBBEE-compliant and black-owned companies. We also allocate more than 3% of our annual net profit to the development of black-owned businesses and enterprise development, and an additional 1.5% to socio-economic development.

HEALTH AND SAFETY

MORE THAN JUST A BUSINESS IMPERATIVE

Ensuring that all our employees perform their duties with full consideration for occupational health and safety is not only vital to the success of our business, but it is also the right thing to do.

Our employees receive continuous mentorship and guidance. Our safety policy, which is regularly reviewed and updated in collaboration with our workforce, aims to motivate, educate, and train staff at all levels of the organisation. We have also established several safety forums and programmes to reinforce our safety culture. Additionally, comprehensive HIV/Aids and health initiatives have been implemented to enhance our employees' wellbeing.

At Lonerock, we believe in the boundless potential of people, which is why we are committed to nurturing and preserving it.

ENVIRONMENTAL IN HARMONY WITH THE ENVIRONMENT

INTELLIGENT ADVICE AND SOLUTIONS...

At Lonerock, we have taken decisive action to reduce our impact on climate change and the environment. We provide our team with the necessary resources to execute projects in harmony with nature.

We are conscious of the environmental impact of construction activities, particularly concerning fossil fuel emissions. Therefore, we rigorously review each project's environmental impact and management plan before implementation.

Our employees are educated about global warming, energy conservation, and waste management through regular safety meetings. Additionally, environmental rehabilitation is integrated into all our project programs to ensure that we minimize our impact on the planet.
